

TO: Interested Parties

FROM: Product Standards Committee

DATE: October 29, 2026

SUBJECT: Uniform Standards Identification List for 2027 with Suggested Priorities

The system for the annual identification and prioritization of new, or amendments to, Uniform Standards is an annual process. This process allows input by Commissioners, regulators, and legislators, consumer representatives, insurers, the Legislative Committee, Consumer Advisory Committee, the Industry Advisory Committee, other interested parties, or the Compact Office.

By formalizing an annual process, the Compact members can determine if the prioritization of Uniform Standards development is aligned with the organization's strategic initiatives and incorporate with budget planning if there are implications to the operating revenues or expenses of the organization.

Interested parties can request new or amended standards by using the form on the Product Standards Committee page on the Compact website. The requests received by June 30, 2026 are found on the Standards page on the Compact website:

<https://www.insurancecompact.org/standards/uniform-standard-identification-requests>

The Product Standards Committee held a public call on August 18, 2026, to receive comments on the list of requests and the carryover items from 2026. As part of this year's process, the Compact Office also conducted a pilot survey of regulators and industry filers to obtain stakeholder feedback on the proposed requests. The survey results served as an additional input to the PSC's prioritization discussions and were considered together with public comments, regulator feedback, and committee deliberations when developing the suggested priorities. The PSC considered this feedback during regulator-only calls on September 1, September 15, October 6, and October 13, and assigned suggested priorities to the requests. The PSC is holding this second public call to receive comments and feedback on the suggested priorities. The PSC will review the comments and finalize the list for referral to the Management Committee.

The PSC will accept written comments until Tuesday, October 27, 2026.
