TO: **Insurance Compact Management Committee**

FROM: **Product Standards Committee**

DATE: **November 16, 2026**

SUBJECT: **PSC Recommendations for the 2027 Uniform Standards Identification List**

The Product Standards Committee submits its proposed recommendation for Uniform Standards development priorities, subject to final PSC approval on November 10, 2026. The annual identification and prioritization process provides an opportunity for Commissioners, regulators, legislators, consumer representatives, insurers, the Legislative Committee, the Consumer Advisory Committee, the Industry Advisory Committee, other interested parties, and the Compact Office to recommend new Uniform Standards or amendments to existing standards.

This annual process helps Compact members align Uniform Standards development priorities with the organization's strategic initiatives and plan for any related budgetary impacts.

The Compact Office compiled the Uniform Standards Identification List for 2027 Prioritization (2027 Identification List) in early July based on Uniform Standards Development requests submitted by June 30, 2026, along with the Uniform Standards remaining for development from the 2026 Uniform Standards Prioritization list.

The Product Standards Committee held public calls on August 18, 2026, and October 29, 2026, to receive comments on the list of requests and the carryover items from 2026. As part of this year's process, the Compact Office conducted a pilot stakeholder survey of regulators and industry filers to gather additional input on the proposed requests. The survey results provided supplemental context for the PSC's prioritization discussions and were considered alongside public comments, regulator feedback, and committee deliberations when developing the recommended priorities. The PSC considered this feedback during regulator-only calls on September 1, September 15, October 6, and October 13, and November 10 and assigned suggested priorities to the requests.

After reviewing the public comments, the PSC assigned recommended priorities for 2027 Uniform Standards development of Very High, High, Medium, Low, or Remove. The PSC also identified requests that require further research or discussion before drafting can begin.

Please contact Mary Block, Chair of the Product Standards Committee, or Susan Ezalarab, the Compact Office's Regulatory Coordinator Consultant, if there are questions.
