Hello - Thank you for sending this revised version of the PSC Options for changing the LTC rate review threshold.

At this time, IA would like to keep the status quo and would vote for Option 1. We understand, however, this option may be problematic for other state DOIs that may have legal prohibitions against this percentage/standard and are interested in better understanding the impact of continuing reviews under this option. With additional information, IA might consider Option 2a and would likely choose a threshold of 15% (or below), so that IA could continue its current process with the Compact and so other states could change their threshold percentages.

Thank you - Andria
