Document Review

Thanks. I would vote for 2 over 1.

Then if I had to choose, it would be 2a, rather than 2 or 2b. That would try to maintain some order to the process, rather than the large level of back and forth I'd expect with 2b. The problem with 15% applying to all states is that Carriers target <15%, to work "within" the limits. Allowing states to vary should result in carriers not targeting a specific threshold.
