INDIVIDUAL LONG-TERM CARE INSURANCE APPLICATION STANDARDS

Scope: These standards are intended to apply to paper, telephonic or electronic applications for coverage provided by individual long-term care insurance policy forms. These standards are intended to apply to new business applications as well as applications used to request changes to existing policies.

The company may submit one multi-purpose application to accommodate new business and all policy changes (reinstatement, plan changes, addition of benefit feature, changes to existing benefit feature, etc.), submit separate applications for each purpose, or submit an application with any combination of purposes (new business and reinstatement only, all policy changes only, etc.).

Mix and Match: These standards are not available to be used in combination with State Product Components as described in § 1101(b) of the Operating Procedure for the Filing and Approval of Product Filings.

Self-Certification: These standards are not available to be filed using the Rule for the Self-Certification of Product Components Filed with the Interstate Insurance Product Regulation Commission.

Drafting Note: Approval by the Interstate Insurance Product Regulation Commission (“IIPRC”) of long-term care insurance product filings in compliance with one or more of the Uniform Standards for Individual Long-Term Care Insurance shall not be deemed as approval to use or provide any component of the product filing pursuant to any federal or state Individual Long-Term Care Insurance Partnership Program (“Partnership”). Action from the Member State may be required before an insurer may use an IIPRC-approved policy or other product component for Partnership. A policy approved by the IIPRC may be eligible to qualify as a Partnership plan in accordance with applicable Partnership filing requirements of the Member State. Upon a company receiving IIPRC approval that a long-term care insurance policy complies with the applicable Uniform Standards, the company may make Partnership certification or request approval of the IIPRC-approved policy directly from a Member State where the company wishes to use the IIPRC-approved policy to provide Partnership coverage.

As used in these standards the following definitions apply:

“Application” means any form used to apply for long-term care insurance whether or not the form is attached to the policy at issue. The application shall be filed for approval.

“Model Act” means the NAIC Long-Term Care Insurance Model Act (#640) as adopted by the NAIC on September 1, 2000, and as subsequently amended.

“Model Regulation” means the NAIC Long-Term Care Insurance Model Regulation (#641) as adopted by the NAIC on September 1, 2000, and as subsequently amended.

“Signed or signature” means any symbol or method executed or adopted by a person with the present intention to authenticate a record, and which is on or transmitted by paper, electronic or telephonic media, and which is consistent with applicable law.

“Written or writing” means a record which is on or transmitted by paper, electronic or telephonic media, and which is consistent with applicable law.

Drafting Notes:

- (1) Any reference to “policy” in these standards shall include a rider, endorsement or amendment used to provide long-term care insurance. “Policy” shall not include a group policy or a group certificate because these standards only apply to individual forms.
- (2) The references to “policy” do not preclude Fraternal Benefit Societies from substituting “certificate” in their forms.
- (3) As the NAIC models referenced in these standards are revised by the NAIC, specific section numbers referenced may change and shall be changed in the standards accordingly.

The following measuring method shall be used in determining the Flesch score:

- (1) For policy forms containing 10,000 words or less of text, the entire form shall be analyzed. For policy forms containing more than 10,000 words, the readability of two, 200-word samples per page may be analyzed instead of the entire form. The sample shall be separated by at least 20 printed lines.
- (2) The number of words and sentences in the text shall be counted and the total number of words divided by the total number of sentences. The figure obtained shall be multiplied by a factor of 1.015.
- (3) The total number of syllables shall be counted and divided by the total number of words. The figure obtained shall be multiplied by a factor of 84.6.
- (4) The sum of the figures computed under (2) and (3) subtracted from 206.835 equals the Flesch reading ease score for the policy form.
- (5) For purposes of (2), (3), and (4), the following procedures shall be used:
 - (a) A contraction, hyphenated word, or numbers and letters, when separated by spaces, shall be counted as one word;
 - (b) A unit of words ending with a period, semicolon, or colon, but excluding headings and captions, shall be counted as a sentence; and
 - (c) A syllable means a unit of spoken language consisting of one or more letters of a word as divided by an accepted dictionary. Where the dictionary shows two or more equally acceptable pronunciations of a word, the pronunciation containing fewer syllables may be used.
- (6) The term “text” as used in this section shall include all printed matter except the following:
 - (a) The name and address of the company; the name, number or title of the policy; the table of contents or index; captions and sub-captions; specifications pages, schedules or tables; and;
